

***Harding County Schools***  
***AHERA Asbestos Management Plan***  
***Yearly Notification***

The newer school buildings of Harding County Schools are asbestos free. However, you may be aware that the old school building has some asbestos in it. There is no reason for concern because the custodians have been trained to inform the district designated asbestos person immediately if there have been any disturbances or if there is any question of a disturbance. The school district also has an Asbestos Management Plan book located in the main office.

Per AHERA (Asbestos Hazard Emergency Response) requirements, CSD facilities are periodically surveyed to inspect the condition of the Asbestos Containing Materials (ACM). Inspections are performed every six months by the district designated asbestos person. Every three years an inspection is also done by a non-district person to ensure the district stays in compliance with all State and Federal laws.

The designated asbestos person for Harding County School District is Steve Leithauser. If you have any questions about our asbestos situation please call him at (605) 375-3241.
